

Skyliner® Technical Bulletin 005: **Skyliner® Repair Tape**

The Skyliner® Fabric System shipments include repair tape to repair small cuts or punctures in the liner system, maintain the integrity of the liner system vapor retarder, and retain cosmetic finish (roof or wall applications).

Great care should be made during installation to not cut or tear the liner fabric. When repair tape is used, it is recommended to use the smallest piece possible to cover the cut or puncture. Repair tape can also be used to cover lap seams when needed.

Flange brace covers are recommended for flange brace penetrations and may be ordered with the Skyliner® System. Please refer to Technical Bulletin 002.
